

Henry Etzkowitz

Etzkowitz is a scholar of international reputation in innovation studies as the originator of the 'Entrepreneurial University' and 'Triple Helix' concepts that link university with industry and government at national and regional levels. As President of the Triple Helix Association, he is at the centre of a unique international network of several hundred scholars and practitioners of university-industry-government relations. Henry is also the co-founder of the Triple Helix International Conference Series, which has produced a series of books, special journal issues and policy analyses since it started in Amsterdam, 1996.

Prior to coming to Stanford, he held the Chair in Management of Innovation, Creativity and Enterprise at Newcastle University Business School, UK and served as Visiting Professor in the Department of Technology and Society, School of Engineering and Applied Sciences, Stony Brook University, US. He has developed several innovative concepts for university-industry-government linkages together with colleagues in the Triple Helix Research Group at Newcastle University Business School, including: (i) the 'Professors of Practice' (half-time dual positions in high-tech firm and academia held by high-tech entrepreneurs with academic backgrounds and research interests), implemented with the support of the Regional Development Agency One Northeast as a signature feature of Newcastle Science City; and (ii) the 'Novum Trivium', a undergraduate degree program proposed as a contribution to the Bologna process, which combines a specialized academic field (e.g. science, arts, engineering, etc.), with training in entrepreneurship and innovation and a foreign language and culture.

Henry is Visiting Professor University of London, Birkbeck, CIMR; University of Edinburgh Business School and in the Department of Technology and Society, School of Engineering and Applied Sciences, Stony Brook University, US. From 2009-Henry is affiliated with Stanford University as a fellow of the Clayman Institute for Gender Research and then H-STAR currently Center for Design Research. Prior to coming to Stanford, he held the Chair in Management of Innovation, Creativity and Enterprise at Newcastle University Business School, UK. He received a BA in History from the University of Chicago, PhD in Sociology from the New School for Social Research and Phd Hon. in Engineering from Linkoping University.

Areas of interests in a GEUM sphere:

Entrepreneurial university, Boundary mechanisms, regional innovation

Main works and publications

Professor Etzkowitz is the author of Triple Helix: University, Industry Government Innovation in Action (Routledge, 2008), MIT and the Rise of Entrepreneurial Science (Routledge, 2002) and

co-author of *Athena Unbound: The Advancement of Women in Science and Technology* (Cambridge University Press, 2000), *Public Venture Capital* (Harcourt, 2000), and *Universities and the Commercialization of Knowledge: New Dimensions for the 21st Century* (Cambridge University Press). Co-edited *The Capitalization of Knowledge: A Triple Helix of University-Industry-Government* (Edward Elgar, 2010) (with Riccardo Viale). He publishes regularly in *Research Policy*, *Science and Public Policy*, *R&D Management*, *European Planning Studies* and *Minerva*.

He has edited numerous special issues including *Silicon Valley: Global Model or Unique Anomaly* *Social Science Information* Dec. 2013.
